

***An Interprofessional Approach to Promote Patient Safety with Quality Care
Houston Methodist Hospital
Wednesday, October 3, 2018***

***Panel Discussion: Interprofessional Frontline Clinical Experiences /
Strategies
Moderator, Dr. Kim Baker***

Objectives:

- 1. Provide a patient care example that involved both disciplines in which a patient outcome may have been or was compromised.***
- 2. Identify whether or not the situation represented a difference of opinion related to how patient care was to be offered.***
- 3. Identify whether or not actions taken were able to promote a positive outcome that supported that safe care was provided to the patient.***
