

International Pediatric Neuro-Oncology Conference

*Sponsored By: Northwestern Mutual
Foundation*

*Presented By: Texas Children's Hospital
Cancer and Hematology Centers*

Recent advances in pediatric brain tumor biology and genetics have generated optimism for novel treatment approaches with potential to improve the care of our patients. This event will bring together scientists and other professionals working in a variety of disciplines to review the state-of-the-art of pediatric neuro-oncology care and discuss where the field will be moving over the next few years. Featured topics will include precision oncology and immunotherapeutic approaches, the promise of harnessing epigenetic alterations, and potential interventions to improve the neurocognitive and psychosocial outcomes of long-term survivors of childhood brain tumors.

Date:

November 9-10, 2017

Location:

BioScience Research
Collaborative Building
6500 Main St.,
Houston, TX 77030

Registration:

For hotel and other
information please

Generous Supporter:

This conference is made possible by the generous support of the Northwestern Mutual Foundation. Northwestern Mutual launched its Childhood Cancer Program in 2012, giving all kids the chance to live life to the fullest by accelerating the search for a cure to pediatric cancer while providing support to families battling the disease and survivors struggling with treatment side effects.
