

One Amazing Team. One Amazing City.

Texas Children's expands in Austin

Every day, Texas Children's Hospital grows, leads and pushes boundaries, never straying from our commitment to provide world-class care to children and women in Texas and everywhere we're needed.

Whether we're treating patients with complex diseases or sharing innovations with the medical community, our physicians and researchers never stop pursuing tomorrow's medical breakthroughs to create a healthier future for our patients and families.

Texas Children's — already the nation's largest and No. 1-ranked pediatric hospital in Texas — is growing in Austin, with a new state-of-the-art hospital for children and women opening in 2024 near Cedar Park. The new hospital will join an array of Texas Children's services already available in Greater Austin communities, including a specialty care clinic, a maternal-fetal medicine clinic, a pediatric-focused urgent care clinic serving patients around the clock and 18 pediatric primary care practices.

About Texas Children's Hospital North Austin

Our new 365,000-square-foot, 52-bed hospital will address the need for expanded pediatric, fetal and Ob/Gyn care in the Central Texas area and will include:
