

## MR-I Got This: Frequently Asked Questions

### MR-I Got This Mock Scanner Program

At Texas Children's Hospital, we are here to help your child feel comfortable with their upcoming MRI experience. Currently available at Texas Medical Center and West Campus, our mock MRI scanner prepares patients for an upcoming MRI by simulating what they will experience. Some of the benefits of this technology include:

- Decrease in anxiety
- Minimizes need for anesthesia

Patients who meet requirements for a mock MRI will have a scheduled appointment with a member of the MR-I Got This Team who will walk patients and families through what to expect during the MRI process.

### Are there any costs or charges associated with this service?

There are no costs associated with this service. Through donations, this exciting technology is available to our patients at no charge. The MRI mock scanners were made possible thanks to generous donations from Nancy and Brady Cook and an anonymous donor.

### What is the average length of time for a mock scanner appointment?

MR-I Got This team members typically spend about 15 minutes educating your child on what to expect throughout the MRI process.

### Are walk-ins allowed?

Please coordinate time by emailing [MRIGotThis@texaschildrens.org](mailto:MRIGotThis@texaschildrens.org) or calling either:  
Texas Medical Center at **832-826-1334** or **832-826-5371**  
Located in Legacy Tower 5<sup>th</sup> floor  
West Campus (Katy) at **832-227-2039** or **832-227-1206**  
Located in Radiology 2nd floor
