Child Life Practicum Program

Overview:

Texas Children's Hospital is the nation's largest, not-for-profit pediatric hospital. This state-of-the-art facility provides primary, secondary and tertiary care for a diverse population of chronically and acutely ill children. Texas Children's Hospital collaborates with the Baylor College of Medicine to support a comprehensive pediatric medical education and research program.

The Child Life Program was established in 1975 to meet the unique developmental, social, emotional, and recreational needs of hospitalized children. Reporting directly to Patient and Family Services, program team members include: 2 managers, approximately 50 child life specialists, 8 activity coordinators, 4 music therapists, 2 art therapists, 4 animal assisted therapy coordinators, 2 media producers, 1 gaming activity coordinator, 2 school coordinators, 2 children's library coordinators, and an administrative secretary.

Child Life Specialists serve as members of interdisciplinary teams in the following patient care areas at Texas Children's Hospital: Pediatric ICU, Transitional ICU, Orthopedics, Endocrine, General Medicine/Transplant, Surgery, Cardiology, Pulmonary, Neurology, Hematology/Oncology, Nephrology, Pediatric Dialysis, Outpatient Clinical Care, Radiology, Emergency Center, Infant Care areas, Premature Nursery, Neonatal ICU, and Women's services. Child Life Specialists in all areas of the hospital utilize therapeutic play to promote growth and development, education, and coping skills of pediatric patients.

Program Description:

The Child Life Practicum at Texas Children's Hospital is designed as a *pre-internship experience* for individuals interested in pursuing a child life internship and a career as a certified child life specialist. During the practicum, students have an opportunity to become familiar with the child life profession and children's reactions to hospitalization and illness. The program's foundation is to provide the students the opportunity to learn how child life specialists apply theory to practice. Therefore, a large part of the practicum schedule consists of students shadowing child life specialists and other staff to gain assessment skills through observation. In addition, students will also have "hands-on" experience with patients and families as they plan activities and develop communication skills.

Practicum placements are unpaid and do not guarantee future employment at Texas Children's Hospital. Housing, transportation, meals, and medical insurance are the responsibility of the student.

For additional general information about practicums, internships, certification, and the child life profession, please visit the Association of Child Life Professionals website, at www.childlife.org.

The specific goals and objectives of the program are:

1. To become familiar with child life profession.
2. To recognize and understand patients' and families' reactions to stress, illness, and pain.
3. To recognize the developmental, psychosocial, and medical needs of patients and families and how those needs are incorporated into goals of normalization and coping.
4. To understand the value of play in the health care setting and increase skills in facilitating therapeutic play through planning group and individual activities.
5. To develop communication skills with patients/families and other health care professionals.
6. To recognize the importance of working within an interdisciplinary team.
7. To continue to develop professional attitudes, maturity, and judgment.
8. To set goals and self-evaluate one's performance.
9. To integrate theory and research into practice (Evidence Based Practice).

Practicum Schedule:

The practicum program offers a comprehensive experience, averaging 24 hours a week within the child life department. Variable options available for length of practicum sessions with students receiving a minimum of 200 hours. Schedules are mutually agreed upon between the child life practicum coordinators and the student. Practicum student schedules consist of two primary rotations in various areas of the hospital working under the supervision of different child life specialists. This schedule may vary due to child life staffing and other considerations. Alternative scheduling options can be discussed on a case by case basis.

Practicum Assignments:

To help the students reach the goals and objectives of the practicum program, the assignments are created to maximize students' learning and to prepare students for a child life internship. Assignments include but are not limited to: a daily journal, activity plans, assigned readings and observations, case studies, and a final project.

Entrance Requirements:

Applicants must:

- A. Be enrolled in, working toward, or have completed coursework that will prepare them to sit for the child life exam (such as child development, theories of child development, etc.) which is verified by transcript (does not need to be official) from all institutions attended.
- B. Have completed 3 out of the 10 ACLP required courses for Academic Eligibility **before Practicum start date:**

- a. Play course
- b. Child Development course
- c. Child Life course

- C. Complete a minimum of 100 hours of verified experience with well children
- D. Ability to pass a mandatory health screening and background check according to Texas Children's Hospital Policy, including the COVID booster vaccination.
- E. The practicum must be completed within one semester if accepted.

A complete application must include the following:

- A. SACLP (former TACLP) Practicum Application
- B. Professional Resume
- C. College or university transcript(s) that list course work and cumulative GPA. *Does not need to be official.*
- D. Two SACLP (former TACLP) Reference Forms - at least one who has directly observed and can assess your work with children. This can be emailed directly to:
childlifepacticum@texaschildrens.org

Unfortunately, the submission of an application does not guarantee placement at Texas Children's Hospital, as our program has a high volume of applicants and a limited number of placements. Due to limited placement availability, we highly recommended that individuals apply for a practicum experience at several institutions.

*Individuals meeting the minimum entrance requirements may submit an application via email. Applicants are responsible for meeting the application deadlines listed below.

Application deadlines: The Child Life Department of Texas Children's Hospital offers child life practicum experiences three times per year. The deadlines for the applications are as such:

Fall Term: March 29

Spring Term: September 19

Summer Term: January 19
