

Liver Transplant Program

Texas Children's
Hospital®

Led by:

Medical Director, Daniel H. Leung, M.D., F.A.A.P., F.A.A.S.L.D.

Surgical Director, John A. Goss, M.D., F.A.C.S.

Liver transplant is the standard of care for children with end-stage liver disease, specific metabolic disorders or unresectable liver tumors. The multidisciplinary Liver Transplant Program at Texas Children's Hospital has performed on average 30-40 liver transplants each year, making us one of the most active pediatric programs in the nation.

Since 1988, more than 500 patients have received new livers. All aspects of pre- and post-liver transplant care are provided in a state-of-the-art setting using the most advanced technology.

PROGRAM FLAGSHIPS

- One of the largest pediatric liver transplant programs in the nation
- Dedicated liver intensive care team equipped with MARS therapy
- Performs whole organ, reduced-liver, in-situ split-liver and ABO incompatible transplants
- Specialized clinics for a range of children's liver problems including biliary atresia, metabolic disease, liver tumors, viral hepatitis, intestinal rehabilitation, cystic fibrosis, congenital heart disease and fatty liver disease
- Designated as a Wilson Center of Excellence

U.S. NEWS & WORLD REPORT

Texas Children's Hospital is recognized as one of the nation's best children's hospitals by *U.S. News & World Report*. As the only hospital in Texas on the Honor Roll, we're proud to have top 10 rankings in all 10 recognized specialties. We are also #2 in the nation for Gastroenterology and GI Surgery, according to the 2019-20 rankings.
