I am going to the eye doctor today!

1. I will check in with MyChart or in person.

2. While I am in the reception area, I can read books from home, listen to music or watch a movie.

3. An assistant will call me when it’s my turn to get my eyes checked.

4. When my family and I get to the exam room, I will sit in a big chair.

5. The assistant will check my eyes and how I see. They will also put in eye drops.

6. The eye drops need time to work, so I can go to the waiting area and watch a movie.

When it is my turn and my eyes are ready, the assistant will call my name to visit with the doctor.

The doctor will show me letters on a screen and will look at my eyes with different types of light.

Depending on the diagnosis, testing needed and complexity of care, visit length will vary between 1 and 4 hours.
