

Texas Children's Hospital, our employees, and volunteers have a shared responsibility to our patients, their families, our co – workers and peers to prevent the transmission of vaccine – preventable diseases. Texas Children's Hospital requires that volunteers submit the following vaccination information during their orientation.

Immunization records, which includes:

- Tetanus/Diphtheria/Pertussis: 1 dose of tetanus–diphtheria-pertussis (Tdap) within the last 10 years, then Td booster every 10 years.
- Measles (Rubeola): If born after 1956, proof of prior immunization with two (2) doses of vaccine; or serologic confirmation of immunity.
- Rubella: Proof of prior immunization with one (1) dose of vaccine; or serologic confirmation of immunity.
- Tuberculosis: QuantiFeron TB Gold/T-Spot Test Results within the past 12 months is acceptable.
 - If previous positive TB Skin Test; proof of positive TB test and a chest x-ray are required.
- Varicella: Documentation of immunization, two (2) doses at appropriate interval or serologic proof of immunity. Written physician documentation of disease history is acceptable.
- Influenza (Flu): a dose of flu vaccine every flu season / annually.
