Care Network

## The Texas Children's Difference

Texas Children's Hospital, a top-ranked pediatric hospital in the nation and #1 pediatric hospital in Texas, has changed the landscape of healthcare over the last 70 years.

- Largest pediatric solid organ transplant program, with the best outcomes in the region
- Developed the novel technique of fetoscopic in-utero spina bifida surgery
- 1st children's hospital with a dedicated inpatient unit for Adult Congenital Heart patients
- Pioneered many of the now standard protocols for treating and curing pediatric cancer and blood disorders
- 120+ locations in Texas
- Duncan Neurological Research Institute comprised of multidisciplinary faculty that continue to identify the underlying causes of brain disorders and discover new treatments for children and adults
- 300+ researchers that accomplished the following:
  - Identified 80+ undiscovered diseases
  - 1,175+ scientific studies published
  - Discovered the gene that causes Rett syndrome
- All specialties ranked by U.S. News & World Report are in the top 10
- #1 pediatric cardiology and heart surgery program in the country 8 years in a row
- U.S. Olympic and Paralympic Committee official medical provider

## Our Vision

*To provide seamless, patient-centered healthcare for women and children through integrated clinical care, innovative research, and community engagement. We aim to empower every woman and child to achieve their fullest potential by fostering strong community partnerships and delivering compassionate, cutting-edge healthcare solutions.*

## What is Texas Children's Care Network?

Texas Children's Care Network coordinates patient care across the healthcare continuum. Physician-led, Texas Children's Care Network provides members with tools to establish and meet the highest quality standards. It empowers each provider to collaborate within the network, focused on providing improved outcomes to patients and families, while remaining independent.

## What Does Texas Children's Care Network Offer Participants?

Texas Children's Care Network provides members with a formal collaboration among a diverse group of healthcare providers, including hospitals, physicians, advanced practice providers, specialists and other healthcare organizations. The primary goal of Texas Children's Care Network is to enhance patient care by improving coordination, quality and efficiency while reducing unnecessary costs.

By creating processes that improve coordination and reduce costs, Texas Children's Care Network seeks to streamline patient care across settings and disciplines, enhancing integration, quality and safety, especially for patients with complex and chronic conditions. The goal is to bolster the overall patient and provider experience, improve outcomes and reduce the cost of care, while allowing each practice to remain and operate independent.

## Texas Children’s Care Network benefits

- Physician-led Board
- Performance Improvement & Care Coordination Management
- Streamlined Referral Process
- Information Technology Integration
- Value-Based Reimbursement Models
- Cost Efficiency and Bargaining Power

## Integrated Referral Process

Features	Provider	Clinic Staff

Access patient medical records	✓	✓
Direct Scheduling	✓	✓
Search for patients by name, DOB, gender	✓	✓
View patient list and demographics	✓	✓
Event dashboard to quickly view patient events	✓	✓
View upcoming appointments	✓	✓

## Contracting

Texas Children's Care Network providers may choose to participate jointly in contracts with payers and employers that are based on quality performance and outcomes of the entire group. The Texas Children's Care Network allows Texas Children's to negotiate contracts with health plans and employers that return enhanced value to each practice — both in terms of quality-adjusted and pay-for-performance incentives, and fee-for-service contracts.

## Clinically Integrated Value-Added Benefits

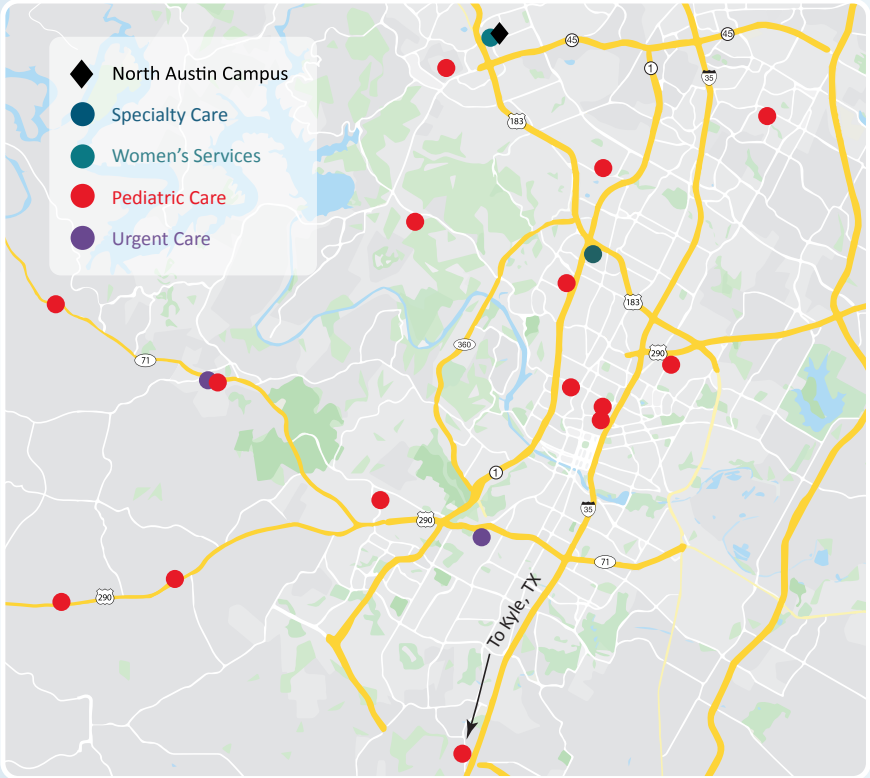

Texas Children's Care Network participating members may receive the following value-added membership benefits:

- Provider profile page on the Texas Children's website Find a Doctor directory featuring specialty, professional headshot, biography and practice location information. This section of the website receives more than 300,000 pageviews each month. Practice may opt to have designation of Texas Children's Care Network added to their profile
- Online scheduling through this physician profile page where appropriate or available
- Access to the following:
  - Preferred pricing through Group Purchasing Organization for Vaccine and Supply Chain
  - Payer contracts and value-based programs
  - Training and education
  - EMR pricing with enhanced support
- Streamlined referrals that support Texas Children's Care Network patients
- Enhanced reimbursement for care management and value-based delivery
- Support to achieve NCQA accreditation if desired
