# Cancer and Hematology Center Fellowships

Texas Children's Cancer and Hematology Center has nearly 200 clinical and research faculty who are committed to training board-eligible and board-certified pediatricians to become subspecialists and leaders in pediatric hematology-oncology. The vast array of clinical service opportunities, preeminent faculty, and state-of-the-art research programs at Texas Children's Hospital and Baylor College of Medicine provide the ideal setting for this specialized training. Designed to prepare physicians for academic careers, this comprehensive training program affords opportunities for fellows to work alongside renowned faculty physicians and researchers to gain valuable in-depth clinical and laboratory research experience.

The Pediatric Hematology-Oncology Fellowship Program at Texas Children's Hospital and Baylor College of Medicine in Houston, Texas is an ACGME-accredited training program currently offering 6 first-year fellowship positions per year. It is one of the largest training programs in the subspecialty and among the finest and most diverse in the nation.

Texas Children's  
Hospital

## Some of the program's major strengths include:

- Experienced faculty with clinical and research expertise who are committed to fellow education
- A robust and varied clinical experience in both hematology and oncology in a quaternary care center with expert multidisciplinary consultative services and state-of-the-art medical facilities
- A comprehensive, didactic curriculum of general teaching conferences (e.g., Foundations of Pediatric Hematology-Oncology, Problem Case Conference, Research Seminar, Reflective Practices and Leadership, Fundamentals of Clinical Investigation, Fellows College), as well as disease-specific conferences (e.g., bone marrow failure, coagulation, hemoglobinopathies, cancer genomics, neuro-oncology, solid tumor)
- Highly-structured research mentorship in numerous well-funded laboratory and clinical research programs
- Formalized and comprehensive training in basic, translational and clinical research with opportunities to receive advanced training in additional areas including public health, epidemiology, and translational research
- Education and experience in writing grants for peer review

## Fellowship opportunities

- Pediatric hematology-oncology fellowship | 3 years
