

# #1 Children's Hospital in Texas

Texas Children's Department of Anesthesiology, Perioperative and Pain Medicine is renowned for providing the highest quality care and full range of services for newborns, children, adolescents and women. Each year, our experts perform more than 60,000 anesthetic procedures, contributing to outstanding patient outcomes for the most common procedures to the most complex, advanced surgeries.

In February 2024, Texas Children's opened a new state-of-the-art hospital for children and women in Austin. It features a comprehensive array of services, including neonatal and pediatric intensive care units, heart and neuroscience centers, a fetal center for advanced fetal interventions and surgery, and more.

Texas Children's  
Hospital

**Texas Children's** is a leader in patient care, education and research and is the primary teaching hospital for Baylor College of Medicine. Our expert physicians and staff combine groundbreaking discoveries, state-of-the-art technology and expertise with a compassionate, family-centered and multifaceted approach to care.
