

## Texas Children's Hospital

# Division of Pediatric Infectious Diseases

### Fellowships and Residencies

Texas Children's Hospital, the primary pediatric teaching hospital for Baylor College of Medicine, offers outstanding patient care and cutting-edge education in its Pediatric Infectious Diseases fellowship program.

Together, Texas Children's Hospital and Baylor College of Medicine offer some of the largest and most highly regarded training programs in the country. Located in the Texas Medical Center in Houston, one of the largest medical complexes in the world, the three-year Pediatric Infectious Diseases fellowship program offers a supportive and challenging environment with leading-edge education in the treatment and prevention of infectious diseases.

Detailed information regarding the Pediatric Infectious Diseases fellowship program can be found on the Baylor College of Medicine website at [bcm.edu/departments/pediatrics/education](https://bcm.edu/departments/pediatrics/education).

## About the Baylor College of Medicine Pediatric Infectious Disease Fellowship

Consistently ranked the #1 children's hospital in Texas, and among the top in the nation, Texas Children's has received widespread recognition for its innovative treatments and breakthrough research in pediatric and women's health. The Pediatric Infectious Diseases Fellowship curriculum prepares fellows for their future in infectious disease diagnosis and prevention with rotations in Antimicrobial Stewardship and Infection Control and Prevention.

Along with the rigorous training throughout the fellowship, fellows have the ability to pursue additional educational degrees and certificates such as a Master of Public Health or Master of Epidemiology. Training the next generation of physicians and scientists and providing state-of-the-art patient care in pediatric infectious diseases is a key mission of Texas Children's Hospital and our partners at Baylor College of Medicine.
